

## Safety Data Sheet

Copyright,2025, 3M Company All rights reserved. Copying and/or downloading of this information for the purpose of properly utilizing 3M products is allowed provided that: (1) the information is copied in full with no changes unless prior written agreement is obtained from 3M, and (2) neither the copy nor the original is resold or otherwise distributed with the intention of earning a profit thereon.

| Document group:       | 18-7049-2  | Version number:  | 10.00      |
|-----------------------|------------|------------------|------------|
| <b>Revision date:</b> | 14/03/2025 | Supersedes date: | 31/03/2021 |

This Safety Data Sheet has been prepared in accordance with the REACH Regulation (1907/2006), as amended for GB.

# **SECTION 1: Identification of the substance/mixture and of the company/undertaking**

#### 1.1. Product identifier

3M Cavity Wax Spray Amber, 08901

#### Product Identification Numbers

UU-0109-4382-5 XS-0034-9166-8

7000041373 7100232708

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses

Coating.

#### 1.3. Details of the supplier of the safety data sheet

Address:3M United Kingdom PLC, 3M Centre, Cain Road, Bracknell, Berkshire, RG12 8HT.Telephone:+44 (0)1344 858 000E Mail:tox.uk@mmm.comWebsite:www.3M.com/uk

#### **1.4.** Emergency telephone number

+44 (0)1344 858 000

## **SECTION 2: Hazard identification**

#### 2.1. Classification of the substance or mixture The retained CLP Regulation (EU) No 1272/2008 as amended for Great Britain

The health and environmental classifications of this material have been derived using the calculation method, except in cases where test data are available or the physical form impacts classification. Classification(s) based on test data or physical form are noted below, if applicable.

The aspiration hazard classification is not required because the product is an aerosol.

#### **CLASSIFICATION:**

Aerosol, Category 1 - Aerosol 1; H222, H229 Skin Corrosion/Irritation, Category 2 - Skin Irrit. 2; H315 Specific Target Organ Toxicity-Repeated Exposure, Category 1 - STOT RE 1; H372 Hazardous to the Aquatic Environment (Chronic), Category 2 - Aquatic Chronic 2; H411

For full text of H phrases, see Section 16.

## 2.2. Label elements

#### The retained CLP Regulation (EU) No 1272/2008 as amended for Great Britain

SIGNAL WORD DANGER.

#### **Symbols**

GHS02 (Flame) |GHS07 (Exclamation mark) |GHS08 (Health Hazard) |GHS09 (Environment) |

#### **Pictograms**

| Ingredient                                    | CAS Nbr    | EC No.    | % by Wt |
|---|------------|-----------|---------|
| naphtha (petroleum), hydrodesulphurized heavy | 64742-82-1 | 265-185-4 | 25 - 35 |

#### **HAZARD STATEMENTS:**

| H222<br>H229<br>H315 | Extremely flammable aerosol.<br>Pressurised container: may burst if heated.<br>Causes skin irritation. |
|----------------------|--|
| H372                 | Causes damage to organs through prolonged or repeated exposure: nervous system.                        |
| H411                 | Toxic to aquatic life with long lasting effects.   |

## **PRECAUTIONARY STATEMENTS**

| Prevention: |  |
|-------------|--|
| P210        | Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. |
| P211        | Do not spray on an open flame or other ignition source.  |
| P251        | Do not pierce or burn, even after use.   |
| P260E       | Do not breathe vapour or spray.  |
| P273        | Avoid release to the environment.  |
|             |  |
| Storage:    |  |

#### P410 + P412

Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

31% of the mixture consists of components of unknown acute oral toxicity.

#### EU VOC Directive (2004/42/EC) labelling: 2004/42/EC IIB(e)(840) 480g/l

Nota L applied. Nota N applied. Nota P applied.

#### 2.3. Other hazards

May displace oxygen and cause rapid suffocation. This material does not contain any substances that are assessed to be a PBT or vPvB

## **SECTION 3: Composition/information on ingredients**

#### 3.1. Substances

Not applicable

#### 3.2. Mixtures

| Ingredient   | Identifier(s)                              | %       | Classification according to Regulation<br>(EC) No. 1272/2008 [CLP], as<br>amended for GB  |
|--|--|---------|---|
| naphtha (petroleum), hydrodesulphurized<br>heavy       | (CAS-No.) 64742-82-1<br>(EC-No.) 265-185-4 | 25 - 35 | Asp. Tox. 1, H304<br>STOT RE 1, H372<br>Nota P<br>Flam. Liq. 2, H225<br>Skin Irrit. 2, H315<br>Aquatic Chronic 2, H411                |

Please see section 16 for the full text of any H statements referred to in this section

For information on ingredient occupational exposure limits or PBT or vPvB status, see sections 8 and 12 of this SDS

## **SECTION 4: First aid measures**

#### 4.1. Description of first aid measures

## Inhalation

Remove person to fresh air. Get medical attention.

#### Skin contact

Immediately wash with soap and water. Remove contaminated clothing and wash before reuse. If signs/symptoms develop, get medical attention.

#### Eye contact

Flush with large amounts of water. Remove contact lenses if easy to do. Continue rinsing. If signs/symptoms persist, get medical attention.

#### If swallowed

Rinse mouth. If you feel unwell, get medical attention.

#### 4.2. Most important symptoms and effects, both acute and delayed

The most important symptoms and effects based on the GB CLP classification include:

Irritation to the skin (localized redness, swelling, itching, and dryness). Target organ effects. See Section 11 for additional details.

#### 4.3. Indication of any immediate medical attention and special treatment required

Exposure may increase myocardial irritability. Do not administer sympathomimetic drugs unless absolutely necessary.

## **SECTION 5: Fire-fighting measures**

#### 5.1. Extinguishing media

Use a fire fighting agent suitable for the surrounding fire.

#### 5.2. Special hazards arising from the substance or mixture

Closed containers exposed to heat from fire may build pressure and explode.

#### Hazardous Decomposition or By-Products

<u>Substance</u> Carbon monoxide Carbon dioxide. <u>Condition</u> During combustion. During combustion.

#### **5.3.** Advice for fire-fighters

Water may not effectively extinguish fire; however, it should be used to keep fire-exposed containers and surfaces cool and prevent explosive rupture.

## **SECTION 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

Use personal protective equipment based on the results of an exposure assessment. Refer to Section 8 for PPE recommendations. If anticipated exposure resulting from an accidental release exceeds the protective capabilities of the PPE listed in Section 8, or are unknown, select PPE that offers an appropriate level of protection. Consider the physical and chemical hazards of the material when doing so. Examples of PPE ensembles for emergency response could include wearing bunker gear for a release of flammable material; wearing chemical protective clothing if the spilled material is a corrosive, a sensitizer, a significant dermal irritant, or can be absorbed through the skin; or donning a positive pressure supplied-air respirator for chemicals with inhalation hazards. For information regarding physical and health hazards, refer to sections 2 and 11 of the SDS. Evacuate area. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Use only non-sparking tools. Ventilate the area with fresh air. For large spill, or spills in confined spaces, provide mechanical ventilation to disperse or exhaust vapours, in accordance with good industrial hygiene practice. Warning! A motor could be an ignition source and could cause flammable gases or vapours in the spill area to burn or explode.

#### 6.2. Environmental precautions

Avoid release to the environment.

#### 6.3. Methods and material for containment and cleaning up

If possible, seal leaking container. Place leaking containers in a well-ventilated area, preferably an operating exhaust hood, or if necessary outdoors on an impermeable surface until appropriate packaging for the leaking container or its contents is available. Contain spill. Cover spill area with a fire-extinguishing foam. Working from around the edges of the spill inward, cover with bentonite, vermiculite, or commercially available inorganic absorbent material. Mix in sufficient absorbent until it appears dry. Remember, adding an absorbent material does not remove a physical, health, or environmental hazard. Collect as much of the spilled material as possible using non-sparking tools. Place in a metal container approved for transportation by appropriate authorities. Clean up residue with an appropriate solvent selected by a qualified and authorised person. Ventilate the area with fresh air. Read and follow safety precautions on the solvent label and Safety Data Sheet. Seal the container. Dispose of collected material as possible.

#### 6.4. Reference to other sections

Refer to Section 8 and Section 13 for more information

## **SECTION 7: Handling and storage**

#### 7.1. Precautions for safe handling

For industrial/occupational use only. Not for consumer sale or use. Do not use in a confined area with minimal air exchange. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Do not breathe dust/fume/gas/mist/vapours/spray. Do not get in eyes, on skin, or on clothing. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Avoid contact with oxidising agents (eg. chlorine, chromic acid etc.) Vapours may travel long distances along the ground or floor to an ignition source and flash back.

#### 7.2. Conditions for safe storage including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F. Store away from heat. Store away from acids. Store away from oxidising agents.

#### 7.3. Specific end use(s)

See information in Section 7.1 and 7.2 for handling and storage recommendations. See Section 8 for exposure controls and personal protection recommendations.

## **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

#### **Occupational exposure limits**

If a component is disclosed in section 3 but does not appear in the table below, an occupational exposure limit is not available for the component.

| Ingredient   | CAS Nbr         | Agency | Limit type   | Additional comments |
|--|-----------------|--------|--|---------------------|
| butane   | 106-97-8        | UK HSE | TWA:1450 mg/m <sup>3</sup> (600<br>ppm);STEL:1810 mg/m <sup>3</sup> (750<br>ppm) |                     |
| 2-butoxyethanol  | 111-76-2        | UK HSE | TWA:123 mg/m3(25<br>ppm);STEL:246 mg/m3(50<br>ppm)                               | SKIN                |
| propane<br>UK HSE : UK Health and Safety Commiss<br>TWA: Time-Weighted-Average<br>STEL: Short Term Exposure Limit<br>CEIL: Ceiling | 74-98-6<br>sion | UK HSE | Limit value not established:   | asphyxiant          |

#### **Biological limit values**

| Ingredient      | CAS<br>Nbr | Agency  | Determinant  | Biological<br>Specimen | Sampling<br>Time | Value       | Additional<br>comments |
|-----------------|------------|---------|--------------|------------------------|------------------|-------------|------------------------|
| 2-butoxyethanol | 111-76-    | UK EH40 | Butoxyacetic | Creatinine in          | EOS              | 240 mmol/mo | 1                      |

2 BMGVs acid urine UK EH40 BMGVs : UK. EH40 Biological Monitoring Guidance Values (BMGVs) EOS: End of shift.

#### 8.2. Exposure controls

#### 8.2.1. Engineering controls

Do not remain in area where available oxygen may be reduced. Use general dilution ventilation and/or local exhaust ventilation to control airborne exposures to below relevant Exposure Limits and/or control dust/fume/gas/mist/vapours/spray. If ventilation is not adequate, use respiratory protection equipment.

#### 8.2.2. Personal protective equipment (PPE)

#### Eye/face protection

Select and use eye/face protection to prevent contact based on the results of an exposure assessment. The following eye/face protection(s) are recommended: Indirect vented goggles.

*Applicable Norms/Standards* Use eye protection conforming to EN 166

#### Skin/hand protection

Select and use gloves and/or protective clothing approved to relevant local standards to prevent skin contact based on the results of an exposure assessment. Selection should be based on use factors such as exposure levels, concentration of the substance or mixture, frequency and duration, physical challenges such as temperature extremes, and other use conditions. Consult with your glove and/or protective clothing manufacturer for selection of appropriate compatible gloves/protective clothing. Note: Nitrile gloves may be worn over polymer laminate gloves to improve dexterity. Gloves made from the following material(s) are recommended:

MaterialThickness (mm)Neoprene.No data availableNitrile rubber.No data availablePolymer laminateNo data available

Breakthrough Time No data available No data available No data available

Applicable Norms/Standards Use gloves tested to EN 374

#### **Respiratory protection**

In case of inadequate ventilation wear respiratory protection. An exposure assessment may be needed to decide if a respirator is required. If a respirator is needed, use respirators as part of a full respiratory protection program. Based on the results of the exposure assessment, select from the following respirator type(s) to reduce inhalation exposure:

Half facepiece or full facepiece supplied-air respirator

For questions about suitability for a specific application, consult with your respirator manufacturer.

*Applicable Norms/Standards* Use a respirator conforming to EN 140 or EN 136

## **SECTION 9: Physical and chemical properties**

#### 9.1. Information on basic physical and chemical properties

| Physical state          | Liquid. |
|-------------------------|---------|
| Specific Physical Form: | Aerosol |

| Colour                                 | Brown                                       |
|--|---|
| Odor                                   | Turpentine                                  |
| Odour threshold                        | No data available.                          |
| Melting point/freezing point           | No data available.                          |
| Boiling point/boiling range            | -44 °C                                      |
| Flammability                           | Flammable Aerosol: Category 1.              |
|  |   |
| Flammable Limits(LEL)                  | 0.7 % volume                                |
| Flammable Limits(UEL)                  | 8.5 % volume                                |
| Flash point                            | -97 °C                                      |
| Autoignition temperature               | 270 °C                                      |
| Decomposition temperature              | No data available.                          |
| рН                                     | substance/mixture is non-soluble (in water) |
| Kinematic Viscosity                    | No data available.                          |
| Water solubility                       | Negligible                                  |
| Solubility- non-water                  | No data available.                          |
| Partition coefficient: n-octanol/water | No data available.                          |
| Vapour pressure                        | 830 Pa [Details:(20°C)]                     |
| Density                                | 0.73 kg/l                                   |
| Relative density                       | 0.73 [ <i>Ref Std</i> :WATER=1]             |
| Relative Vapour Density                | No data available.                          |
| Particle Characteristics               | Not applicable.                             |
|  |   |

#### 9.2. Other information

#### 9.2.2 Other safety characteristics

EU Volatile Organic Compounds Evaporation rate Percent volatile No data available. No data available. 65.27 %

## **SECTION 10: Stability and reactivity**

#### **10.1 Reactivity**

This material may be reactive with certain agents under certain conditions - see the remaining headings in this section

## 10.2 Chemical stability

Stable.

#### **10.3** Possibility of hazardous reactions

Hazardous polymerisation will not occur.

#### **10.4 Conditions to avoid** Heat. Sparks and/or flames.

## **10.5 Incompatible materials** Strong acids.

Strong oxidising agents.

## 10.6 Hazardous decomposition products <u>Substance</u>

**Condition** 

None known.

Refer to section 5.2 for hazardous decomposition products during combustion.

## **SECTION 11: Toxicological information**

The information below may not agree with the material classification in Section 2 and/or the ingredient classifications in Section 3 if specific ingredient classifications are mandated by a competent authority. In addition, statements and data presented in Section 11 are based on UN GHS calculation rules and classifications derived from 3M assessments.

11.1. Information on hazard classes as defined in the retained CLP Regulation (EU) No 1272/2008, as amended for Great Britain.

#### Signs and Symptoms of Exposure

#### Based on test data and/or information on the components, this material may produce the following health effects:

#### Inhalation

Simple asphyxiation: Signs/symptoms may include increased heart rate, rapid respirations, drowsiness, headache, incoordination, altered judgement, nausea, vomiting, lethargy, seizures, coma, and may be fatal. Respiratory tract irritation: Signs/symptoms may include cough, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain. May cause additional health effects (see below).

#### Skin contact

Skin Irritation: Signs/symptoms may include localised redness, swelling, itching, dryness, cracking, blistering, and pain.

#### Eye contact

Contact with the eyes during product use is not expected to result in significant irritation.

#### Ingestion

Gastrointestinal irritation: Signs/symptoms may include abdominal pain, stomach upset, nausea, vomiting and diarrhoea. May cause additional health effects (see below).

#### Additional Health Effects:

#### Single exposure may cause target organ effects:

Central nervous system (CNS) depression: Signs/symptoms may include headache, dizziness, drowsiness, incoordination, nausea, slowed reaction time, slurred speech, giddiness, and unconsciousness. Single exposure, above recommended guidelines, may cause: Cardiac Sensitization: Signs/symptoms may include irregular heartbeat (arrhythmia), faintness, chest pain, and may be fatal.

#### **Toxicological Data**

If a component is disclosed in section 3 but does not appear in a table below, either no data are available for that endpoint or the data are not sufficient for classification.

#### Acute Toxicity

| Name            | Route                           | Species | Value  |
|-----------------|---------------------------------|---------|--|
| Overall product | Dermal                          |         | No data available; calculated ATE >5,000 mg/kg |

ATE = acute toxicity estimate

#### Skin Corrosion/Irritation

| Name   | Species                           | Value                     |
|--|-----------------------------------|---------------------------|
| butane   | Professio<br>nal<br>judgemen<br>t | No significant irritation |
| naphtha (petroleum), hydrodesulphurized heavy          | Rabbit                            | Irritant                  |
| propane  | Rabbit                            | Minimal irritation        |
| Sulphonic acids, petroleum, sodium salts               | similar<br>compoun<br>ds          | Minimal irritation        |
| Distillates (petroleum), hydrotreated heavy paraffinic | Rabbit                            | Minimal irritation        |
| 2-butoxyethanol  | Rabbit                            | Irritant                  |

## Serious Eye Damage/Irritation

| Name   | Species | Value                     |
|--|---------|---------------------------|
|  |         |                           |
| butane   | Rabbit  | No significant irritation |
| naphtha (petroleum), hydrodesulphurized heavy          | Rabbit  | No significant irritation |
| propane  | Rabbit  | Mild irritant             |
| Sulphonic acids, petroleum, sodium salts               | Rabbit  | Moderate irritant         |
| Distillates (petroleum), hydrotreated heavy paraffinic | Rabbit  | Mild irritant             |
| 2-butoxyethanol  | Rabbit  | Severe irritant           |

## Skin Sensitisation

| Name  | Species                  | Value  |
|---|--------------------------|--|
|   |                          |  |
| naphtha (petroleum), hydrodesulphurized heavy | Guinea<br>pig            | Not classified   |
| Sulphonic acids, petroleum, sodium salts      | similar<br>compoun<br>ds | Some positive data exist, but the data are not sufficient for classification |

#### 3M Cavity Wax Spray Amber, 08901

| Distillates (petroleum), hydrotreated heavy paraffinic | Guinea | Not classified |
|--|--------|----------------|
|  | pig    |                |
| 2-butoxyethanol  | Guinea | Not classified |
|  | pig    |                |

#### **Respiratory Sensitisation**

For the component/components, either no data is currently available or the data is not sufficient for classification.

#### Germ Cell Mutagenicity

| Name   | Route    | Value  |
|--|----------|--|
|  |          |  |
| butane   | In Vitro | Not mutagenic  |
| naphtha (petroleum), hydrodesulphurized heavy          | In vivo  | Not mutagenic  |
| naphtha (petroleum), hydrodesulphurized heavy          | In Vitro | Some positive data exist, but the data are not sufficient for classification |
| propane  | In Vitro | Not mutagenic  |
| Sulphonic acids, petroleum, sodium salts               | In Vitro | Not mutagenic  |
| Distillates (petroleum), hydrotreated heavy paraffinic | In Vitro | Some positive data exist, but the data are not sufficient for classification |
| 2-butoxyethanol  | In Vitro | Some positive data exist, but the data are not sufficient for classification |

#### Carcinogenicity

| Name   | Route      | Species                       | Value  |
|--|------------|-------------------------------|--|
| naphtha (petroleum), hydrodesulphurized heavy          | Dermal     | Mouse                         | Some positive data exist, but the data are not sufficient for classification |
| naphtha (petroleum), hydrodesulphurized heavy          | Inhalation | Human<br>and<br>animal        | Some positive data exist, but the data are not sufficient for classification |
| Distillates (petroleum), hydrotreated heavy paraffinic | Dermal     | Mouse                         | Some positive data exist, but the data are not sufficient for classification |
| 2-butoxyethanol  | Inhalation | Multiple<br>animal<br>species | Some positive data exist, but the data are not sufficient for classification |

#### **Reproductive Toxicity**

#### **Reproductive and/or Developmental Effects**

| Name  | Route      | Value                          | Species                       | Test result                 | Exposure<br>Duration    |
|---|------------|--------------------------------|-------------------------------|-----------------------------|-------------------------|
| naphtha (petroleum), hydrodesulphurized heavy | Inhalation | Not classified for development | Rat                           | NOAEL 2.4<br>mg/l           | during<br>organogenesis |
| 2-butoxyethanol                               | Dermal     | Not classified for development | Rat                           | NOAEL<br>1,760<br>mg/kg/day | during<br>gestation     |
| 2-butoxyethanol                               | Ingestion  | Not classified for development | Rat                           | NOAEL 100<br>mg/kg/day      | during<br>organogenesis |
| 2-butoxyethanol                               | Inhalation | Not classified for development | Multiple<br>animal<br>species | NOAEL 0.48<br>mg/l          | during<br>organogenesis |

## Target Organ(s)

## Specific Target Organ Toxicity - single exposure

| Name   | Route      | Target Organ(s)                      | Value                             | Species                | Test result            | Exposure<br>Duration |

#### **Aspiration Hazard**

| Name  | Value             |
|---|-------------------|
| naphtha (petroleum), hydrodesulphurized heavy | Aspiration hazard |

Please contact the address or phone number listed on the first page of the SDS for additional toxicological information on this material and/or its components.

#### **11.2. Information on other hazards**

This material does not contain any substances that are assessed to be an endocrine disruptor for human health.

## **SECTION 12: Ecological information**

The information below may not agree with the material classification in Section 2 and/or the ingredient classifications in Section 3 if specific ingredient classifications are mandated by a competent authority. In addition, statements and data presented in Section 12 are based on UN GHS calculation rules and classifications derived from 3M assessments.

#### 12.1. Toxicity

No product test data available.

| Material   | CAS #      | Organism       | Туре  | Exposure | Test endpoint | Test result |
|--|------------|----------------|---|----------|---------------|-------------|
| butane   | 106-97-8   | N/A            | Data not available<br>or insufficient for<br>classification | N/A      | N/A           | N/A         |

## 12.4. Mobility in soil

| Material        | Cas No.  | Test type                     | Study Type | Test result | Protocol |
|-----------------|----------|-------------------------------|------------|-------------|----------|
| 2-butoxyethanol | 111-76-2 | Estimated Mobility<br>in Soil | Koc        | 67 l/kg     |          |

#### 12.5. Results of the PBT and vPvB assessment

This material does not contain any substances that are assessed to be a PBT or vPvB

#### **12.6.** Other adverse effects

This material does not contain any substances that are assessed to be an endocrine disruptor for environmental effects

## **SECTION 13: Disposal considerations**

#### **13.1 Waste treatment methods**

Dispose of contents/ container in accordance with the local/regional/national/international regulations.

Incinerate in a permitted waste incineration facility. Facility must be capable of handling aerosol cans. Empty drums/barrels/containers used for transporting and handling hazardous chemicals (chemical substances/mixtures/preparations classified as Hazardous as per applicable regulations) shall be considered, stored, treated & disposed of as hazardous wastes unless otherwise defined by applicable waste regulations. Consult with the respective regulating authorities to determine the available treatment and disposal facilities.

The coding of a waste stream is based on the application of the product by the consumer. Since this is out of the control of 3M, no waste code(s) for products after use will be provided. Please refer to the European Waste Code (EWC - 2000/532/EC and amendments) to assign the correct waste code to your waste stream. Ensure national and/or regional regulations are complied with and always use a licensed waste contractor.

#### EU waste code (product as sold)

16 05 04\* Gases in pressure containers (including halons) containing dangerous substances

#### EU waste code (product container after use)

15 01 04 Metallic packaging

#### Regulation (EU) No 649/2012, as amended for GB

No chemicals listed

#### 15.2. Chemical Safety Assessment

A chemical safety assessment has not been carried out for this substance/mixture in accordance with Regulation (EC) No

1907/2006, as amended for GB.

## **SECTION 16: Other information**

#### List of relevant H statements

| EUH066 | Repeated exposure may cause skin dryness or cracking.                           |
|--------|---|
| H220   | Extremely flammable gas.  |
| H222   | Extremely flammable aerosol.  |
| H225   | Highly flammable liquid and vapour.   |
| H229   | Pressurised container: may burst if heated.                                     |
| H280   | Contains gas under pressure; may explode if heated.                             |
| H302   | Harmful if swallowed.   |
| H304   | May be fatal if swallowed and enters airways.                                   |
| H315   | Causes skin irritation.   |
| H319   | Causes serious eye irritation.  |
| H332   | Harmful if inhaled.   |
| H336   | May cause drowsiness or dizziness.  |
| H372   | Causes damage to organs through prolonged or repeated exposure.                 |
| H372   | Causes damage to organs through prolonged or repeated exposure: nervous system. |
| H411   | Toxic to aquatic life with long lasting effects.                                |
|        |   |

#### **Revision information:**

GB Section 02: CLP Ingredient table information was added.

GB Section 02: CLP Remark(phrase) information was added.

GB Section 02: Other hazards phrase information was added.

GB Section 04: First Aid - Symptoms and Effects (GB CLP) information was added.

GB Section 04: Information on toxicological effects information was added.

GB Section 12: Classification Warning information was added.

GB Section 15: Carcinogenicity information information was added.

GB Section 15: Chemical Safety Assessment information was added.

GBSDS Section 14 Transport in bulk - Main Heading information was added.

GBSDS Section 14 UN Number information was added.

CLP: Ingredient table information was deleted.

Section 02: CLP Physical and Health Hazard Statements information was modified.

CLP Remark(phrase) information was deleted.

Label: CLP Percent Unknown information was deleted.

Label: CLP Precautionary - Storage information was modified.

Section 02: Label Elements: GB Percent Unknown information was added.

Section 2: Other hazards phrase information was deleted.

Section 3: Composition/ Information of ingredients table information was added.

Section 3: Composition/ Information of ingredients table information was deleted.

Section 04: First Aid - Symptoms and Effects (CLP) information was deleted.

Section 04: Information on toxicological effects information was deleted.

Section 6: Accidental release personal information information was modified.

Section 7: Conditions safe storage information was modified.

Section 8: Occupational exposure limit table information was modified.

OEL Reg Agency Desc information was modified.

Section 9: Flammability (solid, gas) information information was deleted.

Section 09: Flammability information information was added.

Section 09: Particle Characteristics N/A information was added.

Section 9: Vapour density value information was modified.

Section 11: Acute Toxicity table information was modified.

Section 11: Classification disclaimer information was deleted.

Section 11: GB Classification disclaimer information was added.

Section 11: GB No endocrine disruptor information available warning information was added. Section 11: Germ Cell Mutagenicity Table information was modified. Section 11: No endocrine disruptor information available warning information was deleted. Section 11: Reproductive Toxicity Table information was modified. Section 11: Serious Eve Damage/Irritation Table information was modified. Section 11: Single exposure may cause standard phrases information was modified. Section 11: Skin Corrosion/Irritation Table information was modified. Section 11: Skin Sensitization Table information was modified. Section 11: Target Organs - Repeated Table information was added. Section 11: Target Organs - Repeated Table information was deleted. Section 11: Target Organs - Single Table information was modified. Section 12: 12.6. Endocrine Disrupting Properties information was deleted. Section 12: 12.6. Other adverse effects information was added. Section 12: 12.7. Other adverse effects information was deleted. Section 12: Classification Warning information was deleted. Section 12: Component ecotoxicity information information was modified. Section 12: Mobility in soil information information was added. Prints No Data if Adverse effects information is not present information was deleted. Section 12: No Data text for mobility in soil information was deleted. Section 12: No endocrine disruptor information available warning information was added. Section 12: No endocrine disruptor information available warning information was deleted. Section 12: Persistence and Degradability information information was modified. Section 12:Bioccumulative potential information information was modified. Section 14 Classification Code - Regulation Data information was modified. Section 14 Control Temperature - Regulation Data information was modified. Section 14 Emergency Temperature - Regulation Data information was modified. Section 14 Multiplier - Main Heading information was deleted. Section 14 Multiplier – Regulation Data information was deleted. Section 14 Other Dangerous Goods - Regulation Data information was modified. Section 15: Carcinogenicity information information was deleted. Section 15: Chemical Safety Assessment information was deleted. Section 15: Regulations - Inventories information was added. Section 15: Seveso Substance Text information was added. Two-column table displaying the unique list of H Codes and statements (std phrases) for all components of the given material. information was added. Two-column table displaying the unique list of H Codes and statements (std phrases) for all components of the given material. information was deleted. Section 16: Web address information was added. Section 16: Web address information was deleted.

Section 2: No PBT/vPvB information available warning information was added.

DISCLAIMER: The information on this Safety Data Sheet is based on our experience and is correct to the best of our knowledge at the date of publication, but we do not accept any liability for any loss, damage or injury resulting from its use (except as required by law). The information may not be valid for any use not referred to in this Data Sheet or use of the product in combination with other materials. For these reasons, it is important that customers carry out their own test to

satisfy themselves as to the suitability of the product for their own intended applications. In addition, this SDS is being provided to convey health and safety information. If you are the importer of record of this product into the European Union, you are responsible for all regulatory requirements, including, but not limited to, product registrations/notifications, substance volume tracking, and potential substance registration.

#### 3M SDSs for Great Britain are available at www.3M.com/uk

For Northern Ireland documents, please contact your 3M representative to obtain a copy.
