Copyright, 2025, 3M Canada Company. All rights reserved. Copying and/or downloading of this information for the purpose of properly utilizing 3M products is allowed provided that: (1) the information is copied in full with no changes unless prior written agreement is obtained from 3M, and (2) neither the copy nor the original is resold or otherwise distributed with the intention of earning a profit thereon.

 Document group:
 05-9750-0
 Version number:
 16.00

 Issue Date:
 2025/03/25
 Supercedes Date:
 2020/10/16

This Safety Data Sheet has been prepared in accordance with the Canadian Hazardous Products Regulations.

## **SECTION 1: Identification**

#### 1.1. Product identifier

3M<sup>TM</sup> Strip-Calk (Black), PN 08578

#### **Product Identification Numbers**

60-9800-1955-2 XD-0055-2889-3

#### 1.2. Recommended use and restrictions on use

#### **Intended Use**

Automotive

### **Specific Use**

Caulk for use in seams, joints, and openings.

#### Restrictions on use

Not applicable

#### 1.3. Supplier's details

**Company:** 3M Canada Company **Division:** Automotive Aftermarket

Address: 1840 Oxford Street East, Post Office Box 5757, London, Ontario N6A 4T1

**Telephone:** (800) 364-3577 **Website:** www.3M.ca

## 1.4. Emergency telephone number

Medical Emergency Telephone:1-800-3M HELPS / 1800 364 3577

# **SECTION 2: Hazard identification**

#### 2.1. Classification of the substance or mixture

Skin Sensitizer: Category 1A.

#### 2.2. Label elements

#### Signal word

Warning

## **Symbols**

Exclamation mark

#### **Pictograms**

#### **Hazard Statements**

May cause an allergic skin reaction.

## **Precautionary statements**

#### General:

Keep out of reach of children.

#### **Prevention:**

Avoid breathing dust. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves.

### **Response:**

IF ON SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical attention. Take off contaminated clothing and wash it before reuse.

## Disposal:

Dispose of contents and container in accordance with applicable local, regional, national, and international regulations.

#### 2.3. Other hazards

None known.

3% of the mixture consists of ingredients of unknown acute oral toxicity.

# **SECTION 3: Composition/information on ingredients**

This material is a mixture.

| Ingredient                   | C.A.S. No.   | % by Wt                  | Common Name                                 |
|------------------------------|--------------|--------------------------|---|
| Kaolin                       | 1332-58-7    | 15 - 40 Trade Secret *   | Kaolin                                      |
| Oxide Glass Chemicals        | 65997-17-3   | 15 - 40                  | No Data Available                           |
| Polyisobutylene              | 9003-27-4    | 10 - 30                  | 1-Propene, 2-methyl-, homopolymer           |
| Aluminatesilicate            | 1327-36-2    | < 6                      | Aluminatesilicate                           |
| Aluminum Distearate          | 300-92-5     | 1 - 5                    | No Data Available                           |
| Butyl Rubber                 | 9010-85-9    | 1 - 5                    | 1,3-Butadiene, 2-methyl-, polymer with 2-   |

| Titanium Dioxide             | 13463-67-7   | < 0.5 Trade Secret *     | Titanium oxide (TiO2)                       |
| 4,4'-Thiobis(6-Tert-Butyl-M- | 96-69-5      | < 0.4 Trade Secret *     | Phenol, 4,4'-thiobis[2-(1,1-dimethylethyl)- |
| Cresol)                      |              |                          | 5-methyl-                                   |

Carbon black is inextricably bound in this product. Exposure to carbon black is not expected during product use

Page: 2 of 11

\*The concentration (exact or range) of this component has been withheld as a trade secret.

## **SECTION 4: First aid measures**

#### 4.1. Description of first aid measures

#### Inhalation:

Remove person to fresh air. If you feel unwell, get medical attention.

#### **Skin Contact:**

Immediately wash with soap and water. Remove contaminated clothing and wash before reuse. If signs/symptoms develop, get medical attention.

#### **Eve Contact:**

Flush with large amounts of water. Remove contact lenses if easy to do. Continue rinsing. If signs/symptoms persist, get medical attention.

#### If Swallowed:

Rinse mouth. If you feel unwell, get medical attention.

#### 4.2. Most important symptoms and effects, both acute and delayed

Allergic skin reaction (redness, swelling, blistering, and itching).

#### 4.3. Indication of any immediate medical attention and special treatment required

Not applicable

# **SECTION 5: Fire-fighting measures**

#### 5.1. Suitable extinguishing media

In case of fire: Use a fire fighting agent suitable for ordinary combustible material such as water or foam to extinguish.

#### 5.2. Unsuitable extinguishing media

None Determined

#### 5.3. Special hazards arising from the substance or mixture

None inherent in this product.

#### **Hazardous Decomposition or By-Products**

Substance Condition Carbon monoxide **During Combustion** Carbon dioxide **During Combustion** 

### 5.4. Special protection actions for fire-fighters

Wear full protective equipment (Bunker Gear) and a self-contained breathing apparatus (SCBA). Wear full protective clothing, including helmet, self-contained, positive pressure or pressure demand breathing apparatus, bunker coat and pants, bands around arms, waist and legs, face mask, and protective covering for exposed areas of the head.

# **SECTION 6: Accidental release measures**

## 6.1. Personal precautions, protective equipment and emergency procedures

Use personal protective equipment based on the results of an exposure assessment. Refer to Section 8 for PPE recommendations. If anticipated exposure resulting from an accidental release exceeds the protective capabilities of the PPE listed in Section 8, or are unknown, select PPE that offers an appropriate level of protection. Consider the physical and chemical hazards of the material when doing so. Examples of PPE ensembles for emergency response could include wearing bunker gear for a release of flammable material; wearing chemical protective clothing if the spilled material is a corrosive, a sensitizer, a significant dermal irritant, or can be absorbed through the skin; or donning a positive pressure supplied-air

respirator for chemicals with inhalation hazards. For information regarding physical and health hazards, refer to sections 2 and 11 of the SDS. Evacuate area. Ventilate the area with fresh air. For large spill, or spills in confined spaces, provide mechanical ventilation to disperse or exhaust vapours, in accordance with good industrial hygiene practice.

#### 6.2. Environmental precautions

Avoid release to the environment.

### 6.3. Methods and material for containment and cleaning up

Collect as much of the spilled material as possible. Place in a closed container approved for transportation by appropriate authorities. Clean up residue. Seal the container. Dispose of collected material as soon as possible in accordance with applicable local/regional/national/international regulations.

# **SECTION 7: Handling and storage**

### 7.1. Precautions for safe handling

Keep out of reach of children. Avoid breathing dust/fume/gas/mist/vapours/spray. Do not get in eyes, on skin, or on clothing. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Avoid release to the environment. Wash contaminated clothing before reuse.

## 7.2. Conditions for safe storage including any incompatibilities

No special storage requirements.

# **SECTION 8: Exposure controls/personal protection**

#### 8.1. Control parameters

#### Occupational exposure limits

If a component is disclosed in section 3 but does not appear in the table below, an occupational exposure limit is not available for the component.

| Ingredient                    | C.A.S. No. | Agency | Limit type                     | <b>Additional Comments</b> |
|-------------------------------|------------|--------|--------------------------------|----------------------------|
| Aluminum, insoluble compounds | 1327-36-2  | ACGIH  | TWA(respirable fraction):1     |                            |
|                               |            |        | mg/m3                          |                            |
| Kaolin                        | 1332-58-7  | ACGIH  | TWA(respirable fraction):2     |                            |
|                               |            |        | mg/m3                          |                            |
| Carbon Black                  | 1333-86-4  | ACGIH  | TWA(inhalable fraction):3      |                            |
|                               |            |        | mg/m3                          |                            |
| Titanium Dioxide              | 13463-67-7 | ACGIH  | TWA(Respirable nanoscale       |                            |
|                               |            |        | particles):0.2                 |                            |
|                               |            |        | mg/m3;TWA(Respirable           |                            |
|                               |            |        | finescale particles):2.5 mg/m3 |                            |
| Quartz Silica                 | 14808-60-7 | ACGIH  | TWA(respirable                 |                            |
|                               |            |        | fraction):0.025 mg/m3          |                            |
| Aluminum, insoluble compounds | 300-92-5   | ACGIH  | TWA(respirable fraction):1     |                            |
|                               |            |        | mg/m3                          |                            |
| 4,4'-Thiobis(6-Tert-Butyl-M-  | 96-69-5    | ACGIH  | TWA(inhalable fraction):1      |                            |
| Cresol)                       |            |        | mg/m3                          |                            |

ACGIH: American Conference of Governmental Industrial Hygienists

AIHA: American Industrial Hygiene Association CMRG: Chemical Manufacturer's Recommended Guidelines

TWA: Time-Weighted-Average

STEL: Short Term Exposure Limit

CEIL: Ceiling

## 8.2. Exposure controls

## 8.2.1. Engineering controls

No engineering controls required.

### 8.2.2. Personal protective equipment (PPE)

### Eye/face protection

None required.

## Skin/hand protection

Select and use gloves and/or protective clothing approved to relevant local standards to prevent skin contact based on the results of an exposure assessment. Selection should be based on use factors such as exposure levels, concentration of the substance or mixture, frequency and duration, physical challenges such as temperature extremes, and other use conditions. Consult with your glove and/or protective clothing manufacturer for selection of appropriate compatible gloves/protective clothing.

Gloves made from the following material(s) are recommended: Neoprene

Nitrile Rubber

Polyvinyl Chloride

If this product is used in a manner that presents a higher potential for exposure (eg. spraying, high splash potential etc.), then use of protective coveralls may be necessary. Select and use body protection to prevent contact based on the results of an exposure assessment. The following protective clothing material(s) are recommended: Apron - Neoprene

Apron – Nitrile

Apron - PVC

### Respiratory protection

Under normal use conditions, airborne exposures are not expected to be significant enough to require respiratory protection.

# **SECTION 9: Physical and chemical properties**

9.1. Information on basic physical and chemical properties

| Physical state                          | Solid                  |  |
|---|------------------------|--|
| Specific Physical Form:                 | Viscous putty          |  |
|   |                        |  |
| Colour                                  | Black                  |  |
| Odour                                   | Faint Earthy           |  |
| Odour threshold                         | No Data Available      |  |
| pH                                      | Not Applicable         |  |
| Melting point/Freezing point            | No Data Available      |  |
| <b>Boiling point</b>                    | Not Applicable         |  |
| Flash Point                             | No flash point         |  |
| Evaporation rate                        | Not Applicable         |  |
| Flammability                            | Not Applicable         |  |
|   |                        |  |
| Flammable Limits(LEL)                   | Not Applicable         |  |
| Flammable Limits(UEL)  Not Applicable   |                        |  |
| Vapour Pressure                         | Not Applicable         |  |
| Relative Vapour Density                 | Not Applicable         |  |
| Density                                 | 1.92 g/cm3             |  |
| Relative density                        | 1.92 [Ref Std:WATER=1] |  |
| Water solubility                        | Slight (less than 10%) |  |
| Solubility- non-water                   | Slight (less than 10%) |  |
| Partition coefficient: n-octanol/ water | No Data Available      |  |
| Autoignition temperature                | No Data Available      |  |

| Decomposition temperature      | No Data Available                                    |
|--------------------------------|--|
| Kinematic Viscosity            | No Data Available                                    |
| Volatile Organic Compounds     | 0 g/l [Test Method:calculated SCAQMD rule 443.1]     |
| Volatile Organic Compounds     | 0 % weight [Test Method:calculated per CARB title 2] |
| Percent volatile               | 0 % weight   |
| VOC Less H2O & Exempt Solvents | 0 g/l [Test Method:calculated SCAQMD rule 443.1]     |
| Solids Content                 | 77.6 % weight  |
|                                |  |

| Particle Characteristics | Not Applicable |
|--------------------------|----------------|
|--------------------------|----------------|

# **SECTION 10: Stability and reactivity**

#### 10.1. Reactivity

This material is considered to be non reactive under normal use conditions.

#### 10.2. Chemical stability

Stable.

#### 10.3. Possibility of hazardous reactions

Hazardous polymerization will not occur.

#### 10.4. Conditions to avoid

Sparks and/or flames

### 10.5. Incompatible materials

Not determined

## 10.6. Hazardous decomposition products

**Substance** 

Condition

None known.

Refer to section 5.2 for hazardous decomposition products during combustion.

# **SECTION 11: Toxicological information**

The information below may not be consistent with the material classification in Section 2 if specific ingredient classifications are mandated by a competent regulatory authority. In addition, toxicological data on ingredients may not be reflected in the material classification and/or the signs and symptoms of exposure, because an ingredient may be present below the threshold for labeling, an ingredient may not be available for exposure, or the data may not be relevant to the material as a whole.

### 11.1. Information on Toxicological effects

Signs and Symptoms of Exposure

Based on test data and/or information on the components, this material may produce the following health effects:

#### Inhalation:

No known health effects.

#### **Skin Contact:**

Contact with the skin during product use is not expected to result in significant irritation. Allergic Skin Reaction (non-photo induced): Signs/symptoms may include redness, swelling, blistering, and itching.

\_\_\_\_\_

# **Eye Contact:**

Contact with the eyes during product use is not expected to result in significant irritation.

## **Ingestion:**

No known health effects.

## Carcinogenicity:

| Ingredient  | CAS No.    | Class Description              | Regulation                                  |
|---|------------|--------------------------------|---|
| Silica, Crystalline (Respirable Size)                           | 14808-60-7 | Known To Be Human Carcinogen.  | National Toxicology Program Carcinogens     |
| Carbon black  | 1333-86-4  | Grp. 2B: Possible human carc.  | International Agency for Research on Cancer |
| Silica dust, crystalline, in the form of quartz or cristobalite | 14808-60-7 | Grp. 1: Carcinogenic to humans | International Agency for Research on Cancer |
| Titanium dioxide  | 13463-67-7 | Grp. 2B: Possible human carc.  | International Agency for Research on Cancer |

## **Toxicological Data**

If a component is disclosed in section 3 but does not appear in a table below, either no data are available for that endpoint or the data are not sufficient for classification.

**Acute Toxicity** 

| Name                                | Route                                 | Species | Value  |
|-------------------------------------|---------------------------------------|---------|--|
| Overall product                     | Ingestion                             |         | No data available; calculated ATE >5,000 mg/kg |
| Oxide Glass Chemicals               | Dermal                                |         | LD50 estimated to be > 5,000 mg/kg             |

| Titanium Dioxide | Inhalation | respiratory system                | Some positive data exist, but the data are not sufficient for classification | Rat     | LOAEL 0.01<br>mg/l  | 2 years               |
| Titanium Dioxide | Inhalation | pulmonary fibrosis                | Not classified   | Human   | NOAEL Not available | occupational exposure |

#### **Aspiration Hazard**

For the component/components, either no data are currently available or the data are not sufficient for classification.

Please contact the address or phone number listed on the first page of the SDS for additional toxicological information on this material and/or its components.

# **SECTION 12: Ecological information**

No data available.

# **SECTION 13: Disposal considerations**

### 13.1. Disposal methods

Dispose of contents/ container in accordance with the local/regional/national/international regulations.

Dispose of waste product in a permitted industrial waste facility. Empty drums/barrels/containers used for transporting and handling hazardous chemicals (chemical substances/mixtures/preparations classified as Hazardous as per applicable regulations) shall be considered, stored, treated & disposed of as hazardous wastes unless otherwise defined by applicable waste regulations. Consult with the respective regulating authorities to determine the available treatment and disposal facilities.

# **SECTION 14: Transport Information**

For Transport Information, please visit http://3M.com/Transportinfo or call 1-800-364-3577 or 651-737-6501.

# **SECTION 15: Regulatory information**

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

#### Global inventory status

Contact 3M for more information. The components of this material are in compliance with the provisions of the Korea Chemical Control Act. Certain restrictions may apply. Contact the selling division for additional information. The components of this product are in compliance with the new substance notification requirements of CEPA. This product complies with Measures on Environmental Management of New Chemical Substances. All ingredients are listed on or exempt from on China IECSC inventory. The components of this product are in compliance with the chemical notification requirements of TSCA. All required components of this product are listed on the active portion of the TSCA Inventory.

## **SECTION 16: Other information**

National Fire Protection Association (NFPA) hazard ratings are designed for use by emergency response personnel to address the hazards that are presented by short-term, acute exposure to a material under conditions of fire, spill, or similar emergencies. Hazard ratings are primarily based on the inherent physical and toxic properties of the material but also include the toxic properties of combustion or decomposition products that are known to be generated in significant quantities.

Health: 2 Flammability: 1 Instability: 0 Special Hazards: None

National Fire Protection Association (NFPA) hazard ratings are designed for use by emergency response personnel to address the hazards that are presented by short-term, acute exposure to a material under conditions of fire, spill, or similar emergencies. Hazard ratings are primarily based on the inherent physical and toxic properties of the material but also include the toxic properties of combustion or decomposition products that are known to be generated in significant quantities.
