

# Safety Data Sheet

Copyright,2025, 3M Canada Company. All rights reserved. Copying and/or downloading of this information for the purpose of properly utilizing 3M products is allowed provided that: (1) the information is copied in full with no changes unless prior written agreement is obtained from 3M, and (2) neither the copy nor the original is resold or otherwise distributed with the intention of earning a profit thereon.

 Document group:
 23-2991-0
 Version number:
 9.00

 Issue Date:
 2025/05/29
 Supercedes Date:
 2021/12/16

This Safety Data Sheet has been prepared in accordance with the Canadian Hazardous Products Regulations.

### **SECTION 1: Identification**

#### 1.1. Product identifier

3M<sup>TM</sup> Super 77<sup>TM</sup> Cylinder Spray Adhesive (clear or red)

**Product Identification Numbers** 

62-4979-8030-0 62-4979-8032-6 62-4979-8830-3 HB-0040-4515-7

#### 1.2. Recommended use and restrictions on use

#### **Intended Use**

Industrial use

#### **Specific Use**

Adhesive

#### Restrictions on use

Not applicable

#### 1.3. Supplier's details

**Company:** 3M Canada Company

**Division:** Industrial Adhesives and Tapes Division

Address: 1840 Oxford Street East, Post Office Box 5757, London, Ontario N6A 4T1

**Telephone:** (800) 364-3577 **Website:** www.3M.ca

### 1.4. Emergency telephone number

Medical Emergency Telephone:1-800-3M HELPS / 1800 364 3577

# **SECTION 2: Hazard identification**

#### 2.1. Classification of the substance or mixture

Serious Eye Damage/Irritation: Category 2A.

Reproductive Toxicity: Category 1B.

Specific Target Organ Toxicity (single exposure): Category 1. Specific Target Organ Toxicity (single exposure): Category 3.

Simple Asphyxiants: Category 1 Chemicals Under Pressure: Category 1

### 2.2. Label elements

#### Signal word

Danger

#### **Symbols**

Flame | Gas cylinder | Exclamation mark | Health Hazard |

Extremely flammable chemical under pressure: May explode if heated.

Causes serious eye irritation. May damage fertility or the unborn child. May cause drowsiness or dizziness. May displace oxygen and cause rapid suffocation.

Causes damage to organs: cardiovascular system.

#### **Precautionary statements**

#### **Prevention:**

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not breathe vapor or spray. Wash exposed skin thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Wear protective gloves, eye protection, and respiratory protection.

#### **Response:**

IF INHALED: Remove person to fresh air and keep comfortable for breathing. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned: Get medical attention. Call a POISON CENTER or doctor if you feel unwell. If eve irritation persists: Get medical advice. In case of fire: Use a fire fighting agent suitable for flammable liquids such as dry chemical or carbon dioxide to extinguish. Stop leak if safe to do so. In case of leakage, eliminate all ignition sources.

Store in a well-ventilated place. Keep container tightly closed. Store locked up. Protect from sunlight.

#### Disposal:

Dispose of contents and container in accordance with applicable local, regional, national, and international regulations.

#### 2.3. Other hazards

None known.

# **SECTION 3: Composition/information on ingredients**

This material is a mixture.

| Ingredient              | C.A.S. No.   | % by Wt                | Common Name        |
|-------------------------|--------------|------------------------|--------------------|
| 2-Methylpentane         | 107-83-5     | 15 - 40 Trade Secret * | Pentane, 2-methyl- |
| Cyclohexane             | 110-82-7     | 10 - 30 Trade Secret * | Cyclohexane        |
| Dimethyl Ether          | 115-10-6     | 10 - 30 Trade Secret * | Methane, oxybis-   |
| Non-Volatile Components | Trade Secret | 10 - 30                | Not Applicable     |

| BICYCLO[3.1.1]HEPT-2-   | 31393-98-3   | < 10                 | Bicyclo[3.1.1]hept-2-ene, 2,6,6-trimethyl-, |
|-------------------------|--------------|----------------------|---|
| ENE,2,6,6-              |              |                      | polymer with 6,6-dimethyl-2-                |
| TRIMETHYL-,POLYMER      |              |                      | methylenebicyclo[3.1.1]heptane              |
| WITH 6,6-DIMETHYL-2-    |              |                      |   |
| METHYLENEBICYCLO[3.1.1] |              |                      |   |
| HEPTANE                 |              |                      |   |
| Terpene Phenolic        | Trade Secret | < 10                 | Not Applicable                              |
| Isobutane               | 75-28-5      | 3 - 7 Trade Secret * | Propane, 2-methyl-                          |
| Propane                 | 74-98-6      | 3 - 7 Trade Secret * | Propane                                     |
| Pentane                 | 109-66-0     | < 3.1                | Pentane                                     |
| Ethyl Alcohol           | 64-17-5      | < 2.5                | Ethanol                                     |
| Hexane                  | 110-54-3     | < 0.4                | Hexane                                      |
| Toluene                 | 108-88-3     | < 0.3                | No Data Available                           |

Terpene Phenolic is a non-hazardous material according to WHMIS criteria. Specific information has been withheld as a trade secret.

Non-Volatile Components is a non-hazardous material according to WHMIS criteria. Specific information has been withheld as a trade secret.

# **SECTION 4: First aid measures**

#### 4.1. Description of first aid measures

#### Inhalation:

Remove person to fresh air. Get medical attention.

#### **Skin Contact:**

Immediately wash with soap and water. Remove contaminated clothing and wash before reuse. If signs/symptoms develop, get medical attention.

#### **Eye Contact:**

Immediately flush with large amounts of water. Remove contact lenses if easy to do. Continue rinsing. Get medical attention.

#### If Swallowed

Rinse mouth. If you feel unwell, get medical attention.

#### 4.2. Most important symptoms and effects, both acute and delayed

Central nervous system depression (headache, dizziness, drowsiness, incoordination, nausea, slurred speech, giddiness, and unconsciousness). Target organ effects. See Section 11 for additional details.

#### 4.3. Indication of any immediate medical attention and special treatment required

Exposure may increase myocardial irritability. Do not administer sympathomimetic drugs unless absolutely necessary.

# **SECTION 5: Fire-fighting measures**

#### 5.1. Suitable extinguishing media

In case of fire: Use a fire fighting agent suitable for flammable liquids such as dry chemical or carbon dioxide to extinguish.

#### 5.2. Unsuitable extinguishing media

None Determined

#### 5.3. Special hazards arising from the substance or mixture

Closed containers exposed to heat from fire may build pressure and explode.

\_\_\_\_\_

<sup>\*</sup>The concentration (exact or range) of this component has been withheld as a trade secret.

### **Hazardous Decomposition or By-Products**

SubstanceConditionAldehydesDuring CombustionHydrocarbonsDuring CombustionFormaldehydeDuring CombustionCarbon monoxideDuring CombustionCarbon dioxideDuring Combustion

#### 5.4. Special protection actions for fire-fighters

Water may not effectively extinguish fire; however, it should be used to keep fire-exposed containers and surfaces cool and prevent explosive rupture. Wear full protective clothing, including helmet, self-contained, positive pressure or pressure demand breathing apparatus, bunker coat and pants, bands around arms, waist and legs, face mask, and protective covering for exposed areas of the head.

### **SECTION 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

Use personal protective equipment based on the results of an exposure assessment. Refer to Section 8 for PPE recommendations. If anticipated exposure resulting from an accidental release exceeds the protective capabilities of the PPE listed in Section 8, or are unknown, select PPE that offers an appropriate level of protection. Consider the physical and chemical hazards of the material when doing so. Examples of PPE ensembles for emergency response could include wearing bunker gear for a release of flammable material; wearing chemical protective clothing if the spilled material is a corrosive, a sensitizer, a significant dermal irritant, or can be absorbed through the skin; or donning a positive pressure supplied-air respirator for chemicals with inhalation hazards. For information regarding physical and health hazards, refer to sections 2 and 11 of the SDS. Evacuate area. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Use only non-sparking tools. Ventilate the area with fresh air. For large spill, or spills in confined spaces, provide mechanical ventilation to disperse or exhaust vapours, in accordance with good industrial hygiene practice. Warning! A motor could be an ignition source and could cause flammable gases or vapours in the spill area to burn or explode.

#### 6.2. Environmental precautions

Avoid release to the environment. For larger spills, cover drains and build dikes to prevent entry into sewer systems or bodies of water.

#### 6.3. Methods and material for containment and cleaning up

Contain spill. Cover spill area with a fire-extinguishing foam. Working from around the edges of the spill inward, cover with bentonite, vermiculite, or commercially available inorganic absorbent material. Mix in sufficient absorbent until it appears dry. Remember, adding an absorbent material does not remove a physical, health, or environmental hazard. Collect as much of the spilled material as possible using non-sparking tools. Place in a metal container approved for transportation by appropriate authorities. Clean up residue with an appropriate solvent selected by a qualified and authorized person. Ventilate the area with fresh air. Read and follow safety precautions on the solvent label and SDS. Seal the container. Dispose of collected material as soon as possible in accordance with applicable local/regional/national/international regulations.

# **SECTION 7: Handling and storage**

#### 7.1. Precautions for safe handling

For industrial or professional use only. Not for consumer sale or use. Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Use only non-sparking tools. Take precautionary measures against static discharge. Do not breathe dust/fume/gas/mist/vapours/spray. Do not get in eyes, on skin, or on clothing. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Avoid release to the environment. Avoid contact with oxidizing agents (eg. chlorine, chromic acid etc.) Wear low static or properly grounded shoes. Use personal protective equipment (gloves, respirators, etc.) as required. To minimize the risk of ignition, determine applicable electrical classifications for the process using this product and select specific local exhaust ventilation equipment to avoid flammable vapor accumulation. Ground/bond container and receiving equipment if there is potential for static electricity accumulation during transfer.

\_\_\_\_\_

#### 7.2. Conditions for safe storage including any incompatibilities

Store in a well-ventilated place. Keep cool. Keep container tightly closed. Protect from sunlight. Store away from heat. Store away from oxidizing agents. Store locked up.

# **SECTION 8: Exposure controls/personal protection**

#### 8.1. Control parameters

#### Occupational exposure limits

If a component is disclosed in section 3 but does not appear in the table below, an occupational exposure limit is not available for the component.

| Ingredient      | C.A.S. No. | Agency | Limit type                   | <b>Additional Comments</b> |
|-----------------|------------|--------|------------------------------|----------------------------|
| 2-Methylpentane | 107-83-5   | ACGIH  | TWA: 200 ppm                 |                            |
| Toluene         | 108-88-3   | ACGIH  | TWA:20 ppm                   |                            |
| Pentane         | 109-66-0   | ACGIH  | TWA:1000 ppm                 |                            |
| Hexane          | 110-54-3   | ACGIH  | TWA:50 ppm                   | Danger of cutaneous        |
|                 |            |        |                              | absorption                 |
| Cyclohexane     | 110-82-7   | ACGIH  | TWA:100 ppm                  |                            |
| Dimethyl Ether  | 115-10-6   | AIHA   | TWA:1880 mg/m3(1000 ppm)     |                            |
| Ethyl Alcohol   | 64-17-5    | ACGIH  | STEL:1000 ppm                |                            |
| Propane         | 74-98-6    | ACGIH  | Limit value not established: | simple asphyxiant          |
| Isobutane       | 75-28-5    | ACGIH  | STEL:1000 ppm                |                            |

ACGIH: American Conference of Governmental Industrial Hygienists

AIHA: American Industrial Hygiene Association

CMRG: Chemical Manufacturer's Recommended Guidelines

TWA: Time-Weighted-Average STEL: Short Term Exposure Limit

CEIL: Ceiling

### 8.2. Exposure controls

#### 8.2.1. Engineering controls

Do not remain in area where available oxygen may be reduced. Use general dilution ventilation and/or local exhaust ventilation to control airborne exposures to below relevant Exposure Limits and/or control dust/fume/gas/mist/vapours/spray. If ventilation is not adequate, use respiratory protection equipment. Use explosion-proof ventilation equipment.

#### 8.2.2. Personal protective equipment (PPE)

#### Eye/face protection

Select and use eye/face protection to prevent contact based on the results of an exposure assessment. The following eye/face protection(s) are recommended:

Safety Glasses with side shields

Indirect Vented Goggles

#### Skin/hand protection

Select and use gloves and/or protective clothing approved to relevant local standards to prevent skin contact based on the results of an exposure assessment. Selection should be based on use factors such as exposure levels, concentration of the substance or mixture, frequency and duration, physical challenges such as temperature extremes, and other use conditions. Consult with your glove and/or protective clothing manufacturer for selection of appropriate compatible gloves/protective clothing. Note: Nitrile gloves may be worn over polymer laminate gloves to improve dexterity.

Gloves made from the following material(s) are recommended: Nitrile Rubber

Polymer laminate

#### Respiratory protection

\_\_\_\_\_

An exposure assessment may be needed to decide if a respirator is required. If a respirator is needed, use respirators as part of a full respiratory protection program. Based on the results of the exposure assessment, select from the following respirator type(s) to reduce inhalation exposure:

Half facepiece or full facepiece air-purifying respirator suitable for organic vapours and particulates

Half facepiece or full facepiece supplied-air respirator

Organic vapor cartridges may have short service life.

For questions about suitability for a specific application, consult with your respirator manufacturer.

# **SECTION 9: Physical and chemical properties**

9.1. Information on basic physical and chemical properties

| Physical state                          | Liquid  |  |
|---|---|--|
| Colour                                  | Multicolour   |  |
| Odour                                   | Mild Solvent  |  |
| Odour threshold                         | No Data Available   |  |
| pH                                      | Not Applicable  |  |
| Melting point/Freezing point            | Not Applicable  |  |
| Boiling point                           | <=20 °C   |  |
| Flash Point                             | -45.6 °C [Test Method:Closed Cup] [Details:Flammable Gas] |  |
| Evaporation rate                        | No Data Available   |  |
| Flammability                            | Flammable Liquid: Category 1.                             |  |
|   |   |  |
| Flammable Limits(LEL)                   | 1.2 % volume  |  |
| Flammable Limits(UEL)                   | 27 % volume   |  |
| Vapour Pressure                         | 583985.9 Pa [@ 20 °C ]                                    |  |
| Relative Vapour Density                 | >=1 [ <i>Ref Std</i> :AIR=1]                              |  |
| Density                                 | 0.735 g/ml  |  |
| Relative density                        | 0.735 [ <i>Ref Std</i> :WATER=1]                          |  |

|                          |                |

# **SECTION 10: Stability and reactivity**

#### 10.1. Reactivity

This material may be reactive with certain agents under certain conditions - see the remaining headings in this section.

#### 10.2. Chemical stability

Stable.

#### 10.3. Possibility of hazardous reactions

Dans 6 of 1

#### 3M<sup>TM</sup> Super 77<sup>TM</sup> Cylinder Spray Adhesive (clear or red)

Hazardous polymerization will not occur.

#### 10.4. Conditions to avoid

Heat

Sparks and/or flames

#### 10.5. Incompatible materials

Strong oxidizing agents

#### 10.6. Hazardous decomposition products

**Substance** 

**Condition** 

None known.

Refer to section 5.2 for hazardous decomposition products during combustion.

# **SECTION 11: Toxicological information**

The information below may not be consistent with the material classification in Section 2 if specific ingredient classifications are mandated by a competent authority. In addition, toxicological data on ingredients may not be reflected in the material classification and/or the signs and symptoms of exposure, because an ingredient may be present below the threshold for labeling, an ingredient may not be available for exposure, or the data may not be relevant to the material as a whole.

#### 11.1. Information on Toxicological effects

#### Signs and Symptoms of Exposure

Based on test data and/or information on the components, this material may produce the following health effects:

#### **Inhalation:**

Simple Asphyxiation: Signs/symptoms may include increased heart rate, rapid respirations, drowsiness, headache, incoordination, altered judgement, nausea, vomiting, lethargy, seizures, coma, and may be fatal. May cause additional health effects (see below).

#### **Skin Contact:**

Mild Skin Irritation: Signs/symptoms may include localized redness, swelling, itching, and dryness. Allergic Skin Reaction (non-photo induced) in sensitive people: Signs/symptoms may include redness, swelling, blistering, and itching.

#### **Eye Contact:**

Severe Eye Irritation: Signs/symptoms may include significant redness, swelling, pain, tearing, cloudy appearance of the cornea, and impaired vision.

#### **Ingestion:**

Gastrointestinal Irritation: Signs/symptoms may include abdominal pain, stomach upset, nausea, vomiting and diarrhea. May cause additional health effects (see below).

### **Additional Health Effects:**

#### Single exposure may cause target organ effects:

Central Nervous System (CNS) Depression: Signs/symptoms may include headache, dizziness, drowsiness, incoordination, nausea, slowed reaction time, slurred speech, giddiness, and unconsciousness. Single exposure, above recommended guidelines, may cause: Cardiac Sensitization: Signs/symptoms may include irregular heartbeat (arrhythmia), faintness, chest pain, and may be fatal.

#### Reproductive/Developmental Toxicity:

Contains a chemical or chemicals which can cause birth defects or other reproductive harm.

#### **Additional Information:**

This product contains ethanol. Alcoholic beverages and ethanol in alcoholic beverages have been classified by the International Agency for Research on Cancer as carcinogenic to humans. There are also data associating human consumption of alcoholic beverages with developmental toxicity and liver toxicity. Exposure to ethanol during the foreseeable use of this product is not expected to cause cancer, developmental toxicity, or liver toxicity.

### **Toxicological Data**

If a component is disclosed in section 3 but does not appear in a table below, either no data are available for that endpoint or the data are not sufficient for classification.

Acute Toxicity

| Acute Toxicity Name   | Route                             | Species                           | Value  |
|---|-----------------------------------|-----------------------------------|--|
| Overall product   | Dermal                            |                                   | No data available; calculated ATE >5,000 mg/kg |
| Overall product   | Inhalation-<br>Vapor(4 hr)        |                                   | No data available; calculated ATE >50 mg/l     |
| Overall product   | Ingestion                         |                                   | No data available; calculated ATE >5,000 mg/kg |
| 2-Methylpentane   | Dermal                            |                                   | LD50 estimated to be > 5,000 mg/kg             |
| 2-Methylpentane   | Inhalation-<br>Vapor              |                                   | LC50 estimated to be > 50 mg/l                 |
| 2-Methylpentane   | Ingestion                         |                                   | LD50 estimated to be > 5,000 mg/kg             |
| Dimethyl Ether  | Inhalation-<br>Gas (4<br>hours)   | Rat                               | LC50 164,000 ppm                               |
| Cyclohexane   | Dermal                            | Rat                               | LD50 > 2,000 mg/kg                             |

| Name            | Value             |
|-----------------|-------------------|
| 2-Methylpentane | Aspiration hazard |
| Cyclohexane     | Aspiration hazard |
| Pentane         | Aspiration hazard |
| Hexane          | Aspiration hazard |
| Toluene         | Aspiration hazard |

Please contact the address or phone number listed on the first page of the SDS for additional toxicological information on this material and/or its components.

# **SECTION 12: Ecological information**

No data available.

# **SECTION 13: Disposal considerations**

#### 13.1. Disposal methods

Dispose of contents/ container in accordance with the local/regional/national/international regulations.

Incinerate in a permitted waste incineration facility. As a disposal alternative, utilize an acceptable permitted waste disposal facility. Empty drums/barrels/containers used for transporting and handling hazardous chemicals (chemical substances/mixtures/preparations classified as Hazardous as per applicable regulations) shall be considered, stored, treated & disposed of as hazardous wastes unless otherwise defined by applicable waste regulations. Consult with the respective regulating authorities to determine the available treatment and disposal facilities.

For Transport Information, please visit http://3M.com/Transportinfo or call 1-800-364-3577 or 651-737-6501.

# **SECTION 15: Regulatory information**

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

#### Global inventory status

Contact 3M for more information. The components of this material are in compliance with the provisions of the Korea Chemical Control Act. Certain restrictions may apply. Contact the selling division for additional information. The components of this material are in compliance with the provisions of Australia National Industrial Chemical Notification and Assessment Scheme (NICNAS). Certain restrictions may apply. Contact the selling division for additional information. The components of this material are in compliance with the provisions of Japan Chemical Substance Control Law. Certain restrictions may apply. Contact the selling division for additional information. The components of this material are in compliance with the provisions of Philippines RA 6969 requirements. Certain restrictions may apply. Contact the selling division for additional information. The components of this product are in compliance with the new substance notification requirements of CEPA. This product complies with Measures on Environmental Management of New Chemical Substances. All ingredients are listed on or exempt from on China IECSC inventory. The components of this product are in compliance with the chemical notification requirements of TSCA. All required components of this product are listed on the active portion of the TSCA Inventory.

### **SECTION 16: Other information**

National Fire Protection Association (NFPA) hazard ratings are designed for use by emergency response personnel to address the hazards that are presented by short-term, acute exposure to a material under conditions of fire, spill, or similar emergencies. Hazard ratings are primarily based on the inherent physical and toxic properties of the material but also include the toxic properties of combustion or decomposition products that are known to be generated in significant quantities.

Health: 2 Flammability: 4 Instability: 0 Special Hazards: None
